

Dear placement participant,

On behalf of Durham College, I would like to thank you for participating in the work placement program for our Science and Engineering Technology students. It is such a wonderful experience for our students to actually spend time in the workplace. In addition to the hands on participation, you have provided the invaluable opportunity for students to do some networking.

It is our hope that this additional practical experience will be a catalyst for the students' careers. You may also wish to visit our Hired Career Services website if you are looking for future employees. <https://hired.durhamcollege.ca/home.htm>

Should you have any questions or feedback on our program, please feel free to contact me.

Thank you so much,

Maureen Green, Student Advisor
School of Science and Engineering Technology
